New for 2024...

INVISOGLIDE DOOR

Building on the proven success of the established Visoglide system, we are now introducing the new INVISOGLIDE DOOR, bringing even slimmer sight lines and elegant aesthetics to the range.

Featuring a new bonded glazing system, INVISOGLIDE provides enhanced security and extremely slim profiles. The sliding sashes are bonded using a high-quality single-component adhesive.

Providing enhanced security, the bonding process also enables slim profiles to be used, with 20mm and 26mm interlock options. It also means that the outer frame can be concealed into the aperture.

Max Height (mm)	Max Width (mm)	Max Sash Weight	Glass (mm)	Interlock Options	U Value	DSER
2500mm (per sash)	No max width	250kg	32mm (bonded)	20mm or 26mm	1.4W/m²K (1.0 centre pane)	A Rating
